

The Recovery Phase

Beyond the immediate need for first response to a disaster, is the longer term requirement for the recovery and reconstruction of foodservice facilities.

Kitchens To Go has developed a state of the art solution for interim food service with the introduction of our modular kitchen complexes.. KTG modular kitchen complexes are relocatable and offer all of the advantages of open, clear span permanent commercial kitchens. Our modular complexes meet all health code requirements and are constructed to meet all structural standards for wind load, snow load and seismic design requirements. We offer a wide range of complimentary facilities such as dining areas, cold and frozen storage, offices and restrooms which are fully integrated with KTG kitchen facilities.

Kitchens To Go / Carlin Manufacturing

For lease:

Kitchens To Go offers a wide spectrum of options for long and short term leases on mobile and modular commercial kitchens and integrated facilities such as cold and frozen storage, ware washing and dining facilities, as well as other related products and services. KTG leases exclusively Carlin-built equipment.

For purchase:

Carlin Manufacturing the foremost manufacturer of mobile and modular commercial kitchens, has a long-standing tradition of meeting needs in such areas as high volume commercial kitchens, disaster relief and military field kitchens. Financing is available when appropriate.

Kitchens To Go and Carlin Manufacturing have a client list that spans all branches of the military, hospitals, First Responder organizations, municipalities, correctional facilities, universities and major corporations throughout the world.

DISASTER RESPONSE
AND
RECOVERY PROGRAM

IN THE EVENT OF A NATURAL DISASTER OR A NATIONAL EMERGENCY
KITCHENS TO GO HAS THE RESOURCES TO PROVIDE HIGH VOLUME MOBILE KITCHENS
TO FIRST RESPONDERS IN ANY PART OF THE COUNTRY.

Levels of Participation in the Kitchens To Go Disaster Response and Recovery Program

In order to mobilize quickly and efficiently, we have programs providing levels of partnership to fulfill your mass feeding mission.

Kitchens To Go offers three Levels of Partnership that will streamline the process of getting your organization in full operation in the shortest amount of time.

Level One

Level One registers your contact information and provides KTG with all of the required data that is necessary to mobilize equipment. Information such as your company structure, financial and insurance information, point of contact and geographic areas of operation will assist in this process. **Level One** registration does not guarantee the availability of equipment, but allows more rapid processing of information during a disaster or in time of need. A 24-hour telephone number will be supplied to all pre-registration participants.

Level Two

Level Two requires the information of **Level One** with the additional financial commitment of an annual stand-by fee that guarantees the delivery of a mobile kitchen within 72 hours of notice anywhere in the continental United States. **Level Two** fulfills the requirement of an in-place contingency plan and gives you the ability to make commitments on behalf of your organization to plan an appropriate response to the threat of actual disaster or national emergency.

Level Three

Level Three is a full partnership in which your organization and Kitchens To Go co-own specific pieces of equipment that KTG maintains and manages on your behalf when not required for emergency operations.

We understand that **Level Three** requires a substantial investment, but for major corporations, utility companies, transportation companies and government agencies, there can be no greater assurance of your ability to provide for the feeding of your people in the event of a large incident.

Level Three guarantees that your equipment is delivered and fully operational within 24 hours to specified sites.
